

Jeco Plastic Products, L.L.C.

IACMI July 26-28 2016
Custom Plastic Molding Capabilities

Jeco Plastics

Privately owned SME. Founded 1973; 43 years of experience in high tolerance custom thermoplastic products. ITAR, ISO 9001-2008. Commerce Department E Award 2016 for export excellence.

Primary markets. Worldwide automotive, printing, aerospace, and pharmaceutical industries

Facilities

Twin Sheet Pressure Forming Facilities

Closed loop, automatic loading and unloading, particle controlled forming room for low cost-high tolerance parts

Heavy duty, high tolerance CNC router for ALL thermoplastics

Quick tool changes, short runs, inexpensive tooling

Automatic window frame for quick changeovers

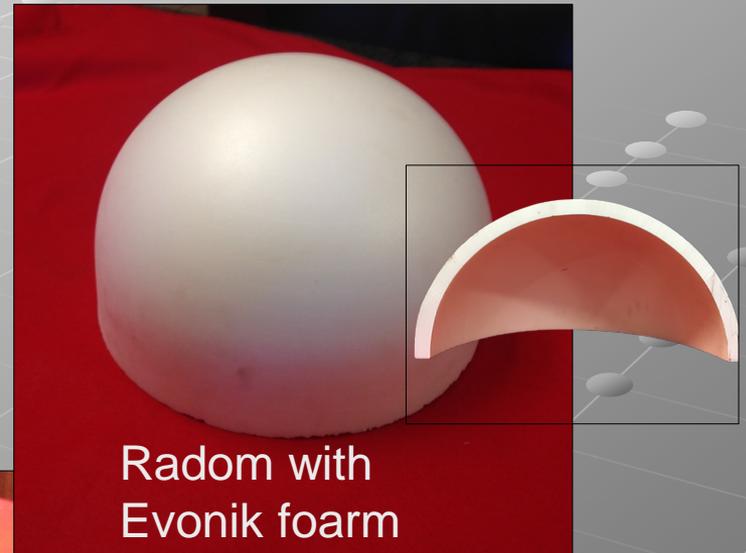

Full five axis trimming

Thermoplastic composites with continuous fibers

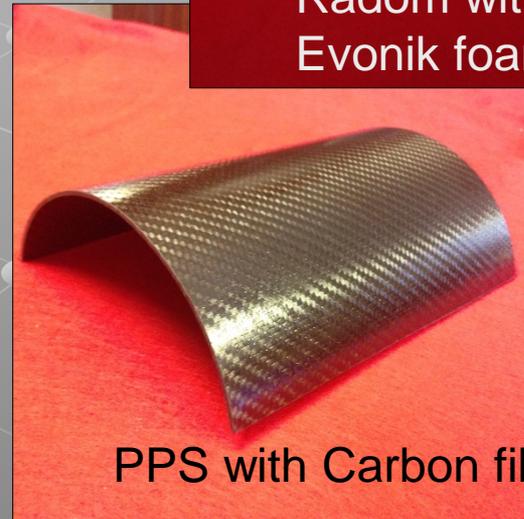

Football pads

Radom with
Evonik foam

Cryogenic door
liner for NASA

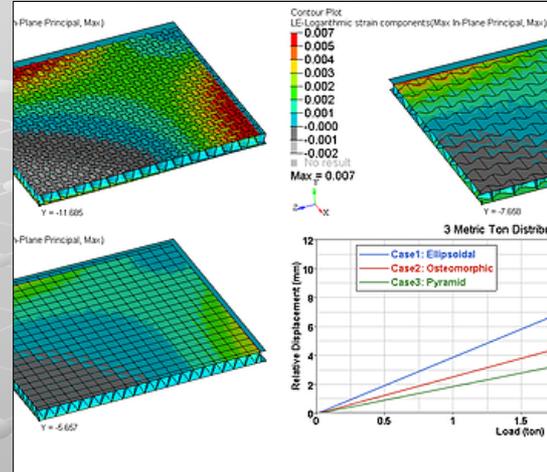

PPS with Carbon fiber

Laminates

HDPE laminate with carbon fiber center layer

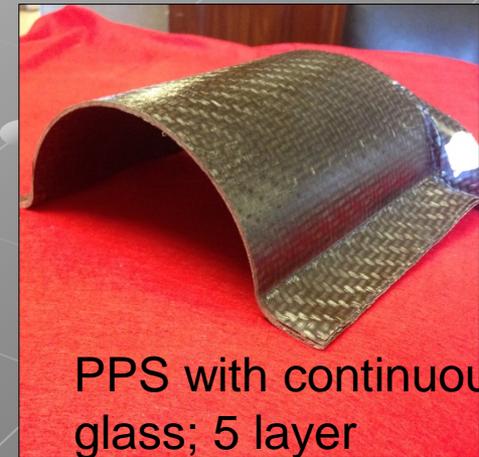

3 layer laminate of dissimilar materials for thermoplastic armor backup

24 layers of PEKK with unidirectional carbon fiber

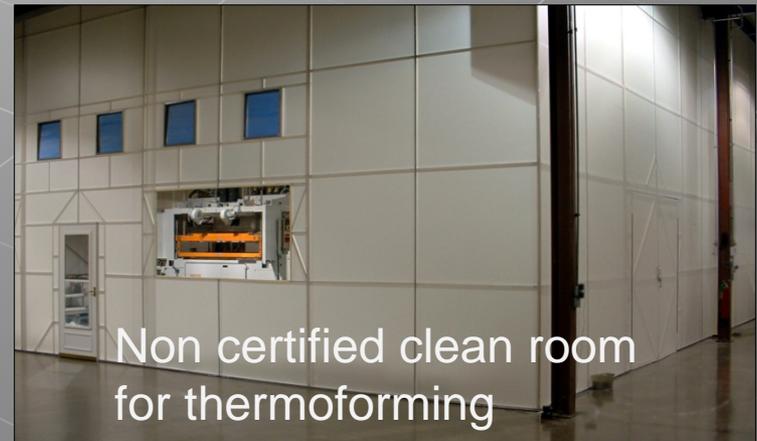

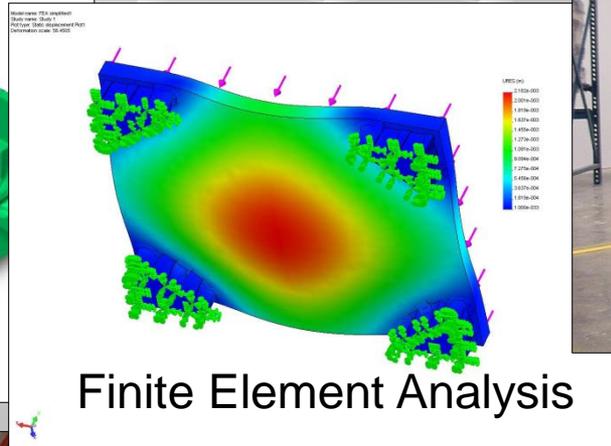

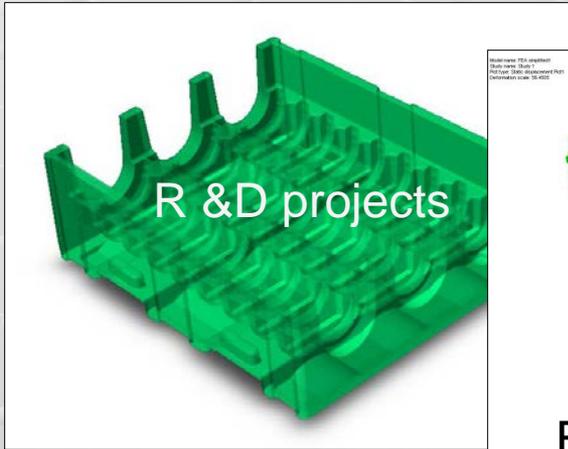

Rohacell with Curv laminate top

PPS with continuous glass; 5 layer laminate

Special Capabilities

How work with IACMI members

- Product development
- Materials testing
- Weight reduction
- Unusual operating conditions
- Electromagnetic transparency or opacity
- Material replacement
