

**Composites<sup>®</sup>  
International**

**Company Overview**

# Global Manufacturing

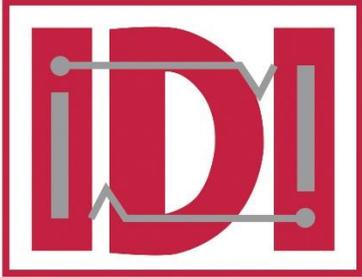

## Worldwide & Strategically Located

# How We Help You Win

We're about Thermoset Composite Materials and Ideas...

- **Creativity** - in the design and development of custom composite solutions
- **Commitment** – to the continued growth and development of the composites industry
- **Collaboration** - with our customers, suppliers, associates and communities to create something new and meaningful

**Composites  
Technology Center**

*Focused on ideas, approaches & materials to address engineering and performance challenges.*

The Technology Center's mission is to provide

**Ideas and materials that deliver meaningful results to customers.**

We do that by focusing on three key deliverables:

1. Identifying what customers value (*Inquiry*)
2. Developing solutions that optimize performance (*Ideas*)
3. Delivering results that provide customers a competitive advantage (*Innovation*)

# Wide variety of composite combinations

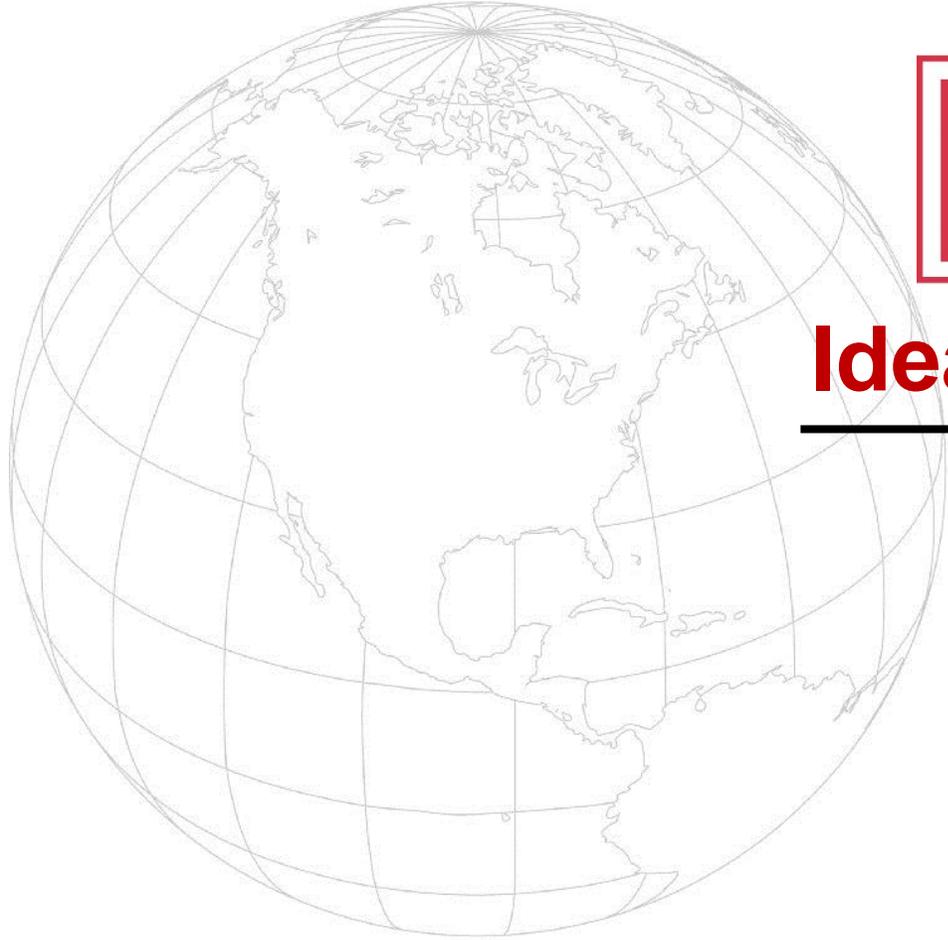

Resin Systems	Reinforcements	Engineering Fillers	Process Methods
UPR's	E-glass	Clays	Injection molding
Vinyl Esters	S-glass	Hydrated Alumina	Compression molding
Epoxies	Carbon Fibers	Carbonates	UV cure
Benzoxazines	Tapes	Natural	Air cure
Polyurethanes	Multi-directional Wovens		

**Development Process** - Project team defines an issue or problem to be addressed with a composite solution

- **Material attributes and product requirements driven by:**
  - Chemistry choices
  - Reinforcement choices
  - Processing choices
  - Testing choices
- **Material sampling**
- **Prototype molding**
- **Testing**

**All in the  
same  
building**

**Composites<sup>®</sup>  
International**  
**Ideas for Meaningful Results.**
